## Health Care Instructions Worksheet Part II of Minnesota Health Care Directive

#### MY HEALTH CARE GOALS

Having a sense of what is important to you can help your decisionmakers make health care decisions under different and complex circumstances. Read each statement below and on a scale of "0" to "4," rate how important each of the health care goals are to you. In this case, "4" means "Extremely Important and "0" means "Not Important At All." Remember reasonable medical care should always include maintaining a person's comfort, hygiene, and human dignity.

I also want my decisionmakers to know the following things are important to me when receiving health care:

#### **My Medical Treatment Preferences**

It is helpful for others to know if and why you have strong feelings about certain medical treatments. Some of the more difficult medical decisions are about treatments used to prolong life, such as those listed below. Most medical treatments can be tried for a while and then stopped if they do not help. Discuss these medical treatments with a health care professional to make sure you understand what they might mean for you given your current as well as future health conditions.

| Medical Procedure   | When It Is Used and<br>Its Effects   | My Feelings About This Procedure |
|---|--|----------------------------------|
| Ventilator/Respirator<br>A breathing machine  | When you cannot breathe on your own  |                                  |
| A Do Not Intubate<br>(DNI) order is put on<br>your medical record<br>when you do not want<br>this procedure   | You cannot talk or eat<br>by mouth on this<br>machine  |                                  |
| Nutrition support and<br>hydration  | When you cannot eat<br>or drink by mouth,<br>feeding solutions can<br>provide enough<br>nutrition to support<br>life indefinitely.                                   |                                  |
|   | Feeding solutions can<br>be put through a tube<br>in your stomach,<br>nose, intestine, or<br>veins.  |                                  |
| Cardiopulmonary<br>Resuscitation (CPR)<br>A Do Not Resuscitate<br>(DNR) order is put on<br>your medical record<br>when you do not want<br>this procedure. | Actions to make your<br>heart and lungs start<br>if they stop including<br>pounding on your<br>chest, electric shocks,<br>medications, and a<br>tube in your throat. |                                  |
| Dialysis  | A mechanical means<br>of cleaning the blood<br>when kidneys are not<br>working.  |                                  |

My feelings or concerns about other medical treatments include:

If I am pregnant, my feelings about medical treatment would include:

#### My Religious and Spiritual Beliefs

Religious or spiritual beliefs and traditions influence how people feel about certain medical treatments, what quality of life means to them, and how they wish to be treated when they are dying or when they have died.
